

D91 Crosswalk for Dual Credit and Concurrent Credit Courses 2022-2023

Dual Credit Courses offered at D91 High Schools

Dual credits are courses taken by high school students that are transcribed on their high school and college transcripts. Generally, courses are offered through the student's high school from highly certified Idaho teachers that are contracted with a college or university to teach college courses to high school students. Students must apply and register for dual credit with the college transcribing the credit. Please refer to the D91 course catalog for more course information.

Please note that the D91 Crosswalk is a working document and is subject to change each school year.

Students can use Idaho State Advanced Opportunity funds to pay for Dual Credit and Concurrent Credit courses. Students are responsible for applying for state funding to pay for their courses. You can find more information about these funds at [Advanced Opportunities / Student Engagement & Safety Coordination / SDE \(idaho.gov\)](#) or [Advanced Opportunities / Home \(ifschools.org\)](#)

Concurrent Enrollment

Concurrent enrollment courses are courses taken by a high school student on a college campus or online and are taught by the college faculty. Below are college courses that can be taken on college campus and will work for both high school and college credit. Idaho colleges have personnel available to assist students in planning for the transition between high school and college. Reach out to the early college/dual credit offices to learn about options available to high school students. The courses listed below have been reviewed by D91 curriculum team and will meet Idaho High School Graduation requirements. If there is a course at a local college or university that is not on this list, a proposal will need to be made to the district and the course reviewed and approved before being added to the crosswalk.

Please note that the D91 Crosswalk is a working document and is subject to change each school year.

Students can use Idaho State Advanced Opportunity funds to pay for Dual Credit and Concurrent Credit courses. Students are responsible for applying for state funding to pay for their courses. You can find more information about these funds at [Advanced Opportunities / Student Engagement & Safety Coordination / SDE \(idaho.gov\)](#) or [Advanced Opportunities / Home \(ifschools.org\)](#)
